Java, C, SQL
HTML & CSS

education

2013–now **Masters** of Informatics — The Masaryk University, Brno
Automatic Text Summarization

2009–2013 **Bachelor** of Informatics — The Masaryk University, Brno
Methods of automatic testing in Python language
This thesis deals with the problematics of testing in Python. It contains a description of the usage and code examples of the most common freely available test libraries. The thesis is also a description of the libraries used for creating fake objects. The conclusion contains a summary of the information and comparison of performance of libraries. Selected libraries are applied to the MCC project.

experience

2013–Now **RED HAT** — Brno, Czech Republic
Associate Software Engineer
Maintaining RPM packages of python and related libraries in Fedora and RHEL.
Developing and maintaining RPM packages of python's related Software Collections (RHSCL).
Developing following projects:

- pyp2rpm - converting PyPI packages into specfiles
- spec2scl - converting classic specfiles into scl specfiles
- scltests - framework for testing scl rpm packages

2012–2013 **EMBEDIT** — Brno, Czech Republic
